RE: Special Use Permit SPL18-0140

Dear Jonathan Childers:

The Department of Planning & Community Development accepted your application for a Special Use Permit for the light rail transit system/facilities, referred to as the Lynnwood Link Extension Project, to be located on the east side of I-5 through the City of Shoreline from the south city limits to the north city limits on August 16, 2018. After an initial examination of submitted items, your application has been determined to be *complete* as of August 16, 2018.

A public notice of your proposal will now be issued, followed by a public comment period of 21 days. As discussed previously, the Department will notify you in advance of the public notice date, at which point Sound Transit will be responsible for producing and posting the notice signs. After the public comment period has closed, staff will review the application materials and any comments received, visit the project site and review details of the proposal. Revised or additional information may be needed before a final decision can be made on the proposal. You will be contacted if such new information is required.

Sincerely,

Jennifer K. Wells, CSBA
Project Manager
