# ATTACHMENT TO CERTIFICATE OF SEWER AVAILABILITY

Dated: 29 March 2017

For Applicant: David Huang

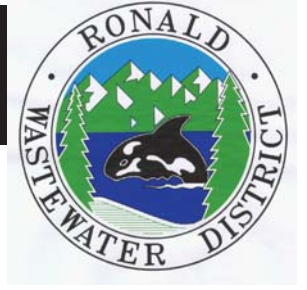

- Sewer service is available contingent upon the owner meeting all District requirements under our Rules and Regulations, Res. 09-26 as amended, and any other District policies pertinent to the particular project. We have reviewed the applicant's request and noted some conditions below. A more comprehensive review during Ronald Wastewater application review process may reveal other conditions to be met.
- Connections are subject to Ronald Wastewater District General Facilities Charge and/or Local Facilities Charge as outlined in Res. 09-26.
- All new connections, additional connections, or revised connections are subject to King County Treatment Capacity Charge. Questions: contact King County Capacity Charge Program (206) 296-1450.
- Approved/Recorded short plat or lot line adjustment submitted to District with side sewer permit application.
- Addition encroaches on existing side sewer. Confirm location of sewer line to avoid conflicts with project.
- This project requires a developer (mainline) extension. Developer to complete application and submit fees.
- May require saddle on main.
- May require right of way permits.
- TV inspection of the 6" lateral from the property to the sewer main by a District approved CCTV Service may be required.
- Cap off of existing sewer required prior to demolition of any structure. Permit and inspection required. NOTE: Unit will remain in billing until cap off is completed per District specifications.
- Easement will be required on District form and must be returned to District for recording along with appropriate fee. Easement must be submitted prior to issuance of any permits.
